Rear End Fill Cap Kits on Moroso pg. 324

No. C9085

AXLE BEARING CONVERSION KIT

Fits: Dana 60 and Chrysler 8-3/4"

- Converts original tapered roller axle bearings to precision ball bearings
- Improves reliability and eliminates the stock load adjuster
- Includes retaining ring and gasket
- One per package

PART #	DESCRIPTION
C8008	Axle Bearing Conversion Kit

No. C8008

REAR AXLE HOUSING VENT

- Reduces internal housing pressure while preventing dirt from entering housing
- Superior quality vent features 1/8" NPT Nickel Plated Steel threads and sintered bronze element for years of dependable service
- Protected low-profile element is recessed, preventing it from being knocked out like stock plastic designs
- Can be used as a replacement for stock vents or adapted to any rear axle housing; ideal for use on narrowed or fabricated housings

PART #	DESCRIPTION
C3406	Rear Axle Housing Vent

No. C3406

2° WEDGE PLATES

- Used to adjust pinion angle or change traction bar angle on leaf spring equipped cars and trucks
- Allows pinion angle change in 2° increments
- Made from 6063-T5 aluminum, they won't crack like cast zinc
- Interlocking ribs allow plates to be stacked without sliding and eliminate unwanted pinion angle change
- Two per package
